

Patrick Stewart

Product Manager/Data Scientist

Innovative, personable and highly motivated self-starter with experience gained in Product Management/Data Science roles within Consulting and Start-ups. Passionate about delivering value through the development of analytics solutions. Competent working with both structured tabular data and unstructured (text) datasets. Strong market knowledge across a broad range of sectors.

Competencies: Product management and design, statistical analysis and modelling, forecasting, data visualisation/dashboarding, natural language processing, and data pipeline development.

Technology skills: Jira, Figma, Python, SQL, R, Azure ML, Databricks, Snowflake, Github, Power BI.

CAREER EXPERIENCE

Risilience, CAMBRIDGE <i>Product Technical Manager</i>	Aug 2025 – Present
- Resilience provides a SaaS platform to large enterprises to analyse and financially quantify their climate risk. - Projects include streamlining data ingestion approach for clients and building out suite of in-platform analytics visualisations.	
Fable Data, LONDON <i>Data Scientist</i>	May 2023 – Aug 2025
- Fable Data is a data aggregator, providing public sector organisations, large corporations and investment firms with real time European consumer spend data, sourced and cleaned from banks and credit card issuers. - Data Science projects include customer segmentation/profiling, revenue/credit forecasting, analytics dashboarding and bespoke data modelling for clients based on underlying data features.	
Algospark, LONDON <i>Data Scientist</i>	Jan 2022 – May 2023
- Worked at a Data Science consultancy across a wide range of sectors including energy, education, technology and hospitality. - Developed learner clustering and profiling analytics software for a large education provider. The aim of the solution was to enable schools to identify and provide timely intervention to learners at risk of not completing their course. - Managed full project lifecycle, including initial proposal, execution and subsequent support after project completion.	
Materials Nexus, LONDON <i>Data Scientist (Contract)</i>	Sept 2021 – Jan 2022
- Worked at materials science technology startup Materials Nexus on a short-term contract. - My role focussed on improving the company's data production and machine learning tasks offered through its software platform.	
Megabuyte, READING <i>Data Analyst</i>	July 2018 – Sept 2020
- Megabuyte provides a market research platform focussed on providing financial data and analysis on the UK technology market. - Role included a significant focus on data pre-processing, modelling and visualisation as well as delivering market analysis reports.	

EDUCATION

King's College London MSc Data Science	2020-2021
<i>Academics:</i> 74% average (distinction) and included modules on Machine Learning, Big Data and Data Warehousing. - Final dissertation project (sponsored by Westminster City Council) was focussed on understanding how people respond and react to Oxford Street's built environment. The project centred on applying natural language processing solutions, trained on geo-located Twitter data, to gain new insights on the Oxford Street District.	
University of Bath BSc Economics	2014-2018
<i>Academics:</i> 2:1 (overall actual) including modules in Health Economics, Advanced Macroeconomics and International Trade. <i>Final dissertation:</i> "The Economic Implications from the adoption of Blockchain Technology".	
ST ALBANS SCHOOL	2008-2013
<i>A-Levels:</i> Maths (A*), Economics (A), Philosophy & Ethics (A), Chemistry (B).	

TECHNICAL SKILLS

- Microsoft Certified in the Azure Data Scientist Associate and Power BI Data Analyst Associate programmes.
- Competent with multiple programming languages and relevant packages – Python (pandas, spaCy, sci-kit learn, Tensorflow, pytorch), SQL and R.
- Frequently uses a range of visualisation tools – Power BI and R Shiny.
- Data skills extend across statistical analysis and modelling, machine learning, web scraping and data strategy and technology.
- Developing proficiency in French.

WIDER INTERESTS

Data - Broader data knowledge updated through various blogs (e.g. Fast Forward Labs, Medium, The Gradient).

Technology - Interested in the broader technology market and frequently read TechCrunch, Hacker News and Exponential View.

Squash – Active member of various squash teams – former Treasurer for University team.

Running – Recreational runner who has now run six half marathons.

Travelling – Keen group traveller who has visited Brazil, Peru, Vietnam, Bali, Cambodia, Thailand, India and USA.
